Welcome

Dear NILKANTH MAHADEV TRUST TEMPLE ,

It has been a privilege to understand your requirement and give you the best solution for you. As required, we have committed to the highest level of quality. That's why we select the best components and industry-leading performance models to ensure your system will produce optimally.

Our highly trained installation crews take pride in delivering beautiful well-made solar arrays. From the panels to the bolts on the roof, we'll deliberately consider every piece of your installation so you can rest easy throughout its many years of service. We take great pride in our guarantee of complete customer satisfaction.

We are looking forward to help you and have a long-term relationship with you. Please go through the proposal and give us your feedback.

Thanks & Regards,
UVR TECHSOL PRIVATE LIMITED

"Benefits of Going Solar"

Introduction to Net Metering

Net metering is a billing mechanism that allows individuals who generate their own electricity, typically through renewable energy sources like solar panels, to receive credit for the excess electricity they generate and feed back into the grid. Essentially, it allows consumers to offset the cost of their electricity by generating their own power and receiving credit for any surplus energy they produce. This is achieved through a special meter that tracks both the electricity consumed from the grid and the electricity generated and fed back into the grid, enabling accurate billing or crediting based on the net difference between the two.

Technical Proposal

Plant Capacity
2.20 KW

Structure Type
Elevated

Inverter Details
String Inverter

Project Location

Bills of Material

Panel

Watt Peak: 550 Wp

Panel Brand: Rayzon Solar

Panel Qty: 4 Nos.

Panel Type: Bifacial

Inverter

Inverter Size: 2.2 kW

Inverter Brands: Solar Yaan

Cable

Cable Brands: Polycab

Cable Size: 4 SQMM

Cable Type: UV - Flexible

Cable Core: SINGAL CORE

Warranty

Panel: 12 Year(s)

Panel Performance: 30 Year(s)

Inverter: 10 Year(s)

Balance Of System: 5 Year(s)

Structure

Structure: Hot Dip GI (Leg & Rafter:
60*40, Perlin: 40*40)

Balance of System

Sr. No.	Equipment	Picture of Equipment	Standard
1	DCBD Unit		Schneider / Siemens / Elmex / C&S / Havells
2	ACDB Unit		Schneider / Siemens / Elmex / C&S / Havells
3	DC Cable		Polycab / RR Kabel
4	AC Cable		Polycab / RR Kabel
5	Mc4 Connectors		Elmex
6	Earthing Kit		True Power / ISC Standard
7	Earthing Cable / Earthing Strip		Polycab / RR Kabel
8	Lighting (LA) Cables		Genome / Kenter
9	Hot Dip GI Pipes		Hidustar / Apollo
10	PVC Conduit Pipes and Fittings		Polycab
11	J Hooks		M8 SS 304
12	Zink Spray		ISC Standard
13	PU Foam (Isulation Sealant)		ISC Standard
14	Additional Equipment	Lugs, Cable Tie, Isulation Tape, etc.	Polycab

Commercial Offer

Price quote for total EPC services for 2.20 KW Solar PV plant as per the mentioned scope of work on turnkey basis as below

Description	Price (IN INR)
Plant Capacity	2.20 KW
System Price	99,000
Tax GST (00.0 %)	0
Total Cost	99,000
Subsidy	63,600
Effective Project Cost	35,400

Notes

1. For Three Phase Meter connections, DISCOM and meter charges are extra and will be payable by the customer at actuals.

Payment Terms

As a percentage of the Net Value of System.

Initial Payment – 70%

A payment of Seventy percent (70%) of the total quotation amount is required upon the client's acceptance of the technical and commercial aspects of this quotation, and prior to the commencement of any work or the ordering of materials.

Final Payment – 30%

The remaining thirty percent (30%) of the total amount is due in full upon completion of the installation of structure and wiring on site before dispatch of solar panel on site.

Project Timeline

The proposed project timelines are shown in the figure below:

Scope of Work

Our Scope

1. Preparation of Engineering Drawing, Design for solar structure and solar power plant as per relevant IS standard
2. Supply of Solar Modules, Inverters, Structures, Cables, and Balance of Plant
3. Installation of structure, solar modules, inverter, AC-DC cable, LT panel etc for solar power plant
4. Installation of monitoring and controlling system for solar power plant
5. Commissioning of Solar Power Plant and supply of power to LT panel of SGD

Customer Scope

1. Providing safe storage place for material during installation & commissioning period.
2. Provide space for to evacuate the solar power
3. Design/ Drawing approval within 7 days.

Solar Savings

Payback Period

1.2 Years

Average Yearly
Generation

3612 Units

Average Annual
Savings

₹ 30,702

Project Cost

₹ 35,400

Trees Saved

73

Co2 Reduction

2 Tonnes

Payment Details

Payment can be paid in Cash or Cheque:
BANK DETAILS: HDFC BANK LTD

ACCOUNT NAME : UVR TECHSOL PRIVATE LIMITED
ACCOUNT NO: 50200102915887
IFSC CODE : HDFC0008848
BRANCH : VASNA BHAYLI WAVES CLUB ROAD

Terms & Conditions

1. Warranty will not be applicable if:
Acts of nature or willful damage is made to the equipment/components.
Improper use or abuse of the components/equipment's by Consumer.
Modification or alterations are made by the purchaser or third party without intimation to the supplier.
2. Change in the final design and offer will be extra at actual and to be paid by the client.
3. The company is not liable for delay in execution for the causes beyond the reasonable control including natural calamities, strikes or labor disputes, Government Orders etc.
4. Liasoning process involves approval and permissions from diverse departments and is a non-time bound process and is a sole responsibility of client. However, the company will actively involve in documentation process to expedite the proposal considering the activity as joint responsibility.
5. The final approval for net-meter installation from DISCOM is their sole discretion and may take a longer time span than expected and is beyond the control of either of the parties which may attract delay in execution.

DISCLAIMER

1. NOTICE OF RISK: The PV system involves substantial risks of injury, damage and dangers to the life for irresponsible activities which include but not limited to:

- a. Rectification of an identified issues by a non-technical or an unauthorized person.
- b. Updating or altering the installed PV system without intimation to principal organization.
- c. Unskilled labors cleaning the modules without appropriate safety measures.
- d. Avoiding recommendations by the principal enterprise towards safety of the entire PV generation plant.
- e. Negligence and failure in maintaining the PV system.
- f. Damaging the system intentionally.

We are not responsible and liable to any losses and damages in connection with the statements mentioned as above.

2. The property is owned by the client after successful installation and commissioning and is responsible to take care of the system as well as the persons associated/ designated by the client.

3. The DPR or offer is not an agreement between the client and service provider but is intended to fulfill the requirement of the client and is prepared and executed as per the work order given by the client.

4. The performance of the system is based on certain assumptions and calculations made with the available technical specifications that are included in the offer. However, the anticipated performance of the PV system installed may deviate marginally from the statements made while designing the project.

5. The proposal is subject to change for any alteration in the scope of work as mentioned in the terms and conditions of the contract testimonial.

6. The client acknowledges all the inherent risks associated with the use of the PV system installed and assumes all the responsibility for the use of the same.

7. The principle enterprise will have a liberty to change the technical specifications for better design which simultaneously will contribute to enhanced generation resulting in higher efficiencies from the existing PV system.
